POSSELT'S TEXTILE LIBRARY,

VOL. III.

RECENT IMPROVEMENTS IN

Textile Machinery RELATING TO WEAVING.

Giving Descriptive Illustrations of the Construction and Operation of the Most Modern Makes of Looms, Jacquards, Spoolers, Winders, Dressers, etc., etc.

ALSO

Illustrating and Explaining the Latest Improvements in Shuttles, Temples, Pickers, Reeds, Heddles, Harnesses, etc.,

FOR THE USE OF

Manufacturers, Mill Managers, Designers, Overseers, Loomfixers, Students and Inventors.

BY

E. A. POSSELT,

Consulting Expert on Textile Designing and Manufacturing. Author and Publisher of "Technology of Textile Design," "The Jacquard Machine Analyzed and Explained," "Structure of Fibres, Yarns and Fabrics," "Textile Calculations;" "Posselet's Textile Library;" Editor of "The Textile Record;" Editor of Textile Terms in "Standard Dictionary" and "Iconographic Encyclopaedia of the Arts and Sciences;" Principal of "Posselet's Private School of Textile Design;" formerly Headmaster of the Textile Department of the Pennsylvania Museum and School of Industrial Art, Philadelphia.

WITH OVER 600 ILLUSTRATIONS.

PRICE, THREE DOLLARS.

PHILADELPHIA:

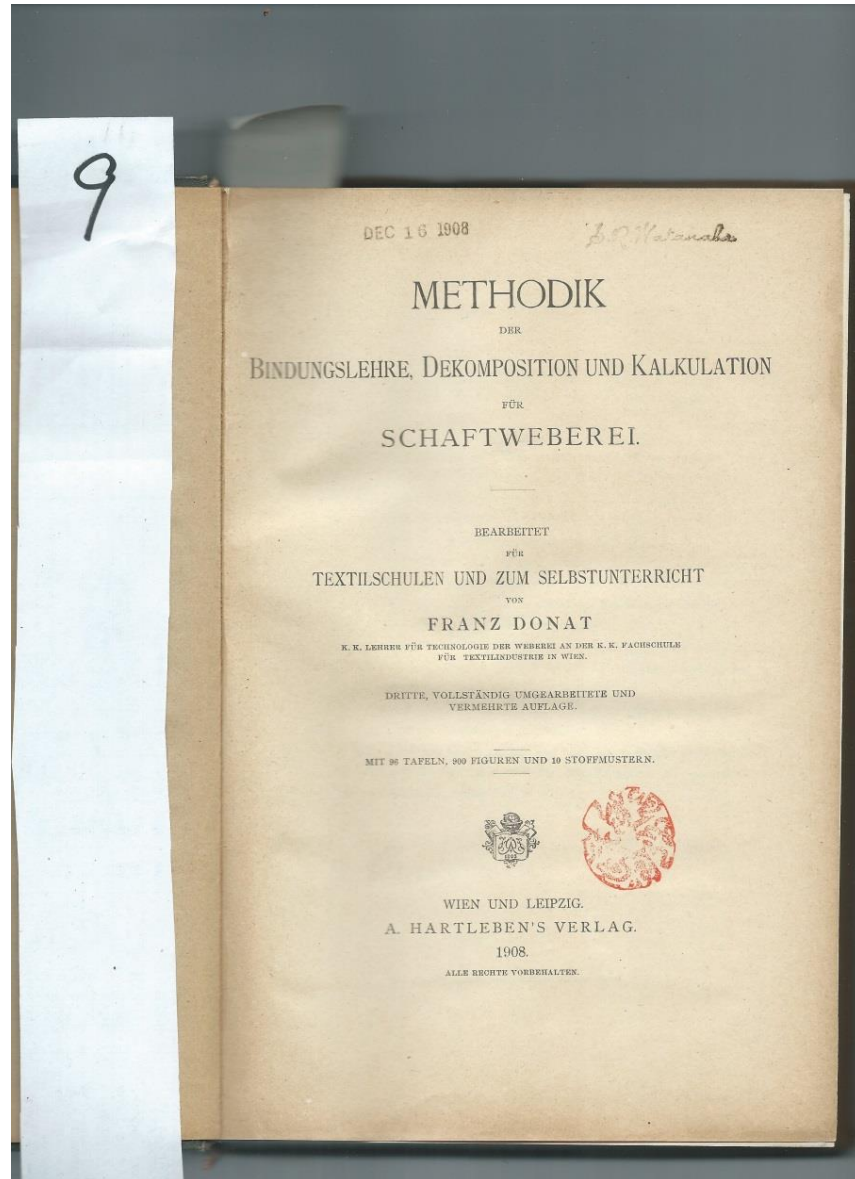

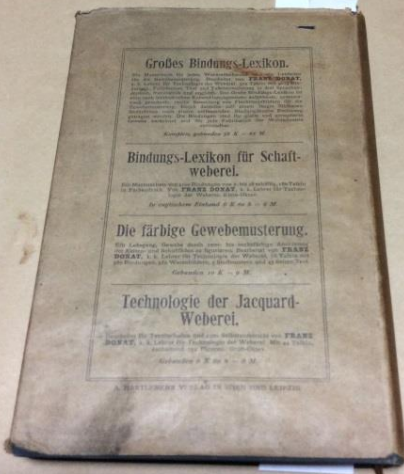

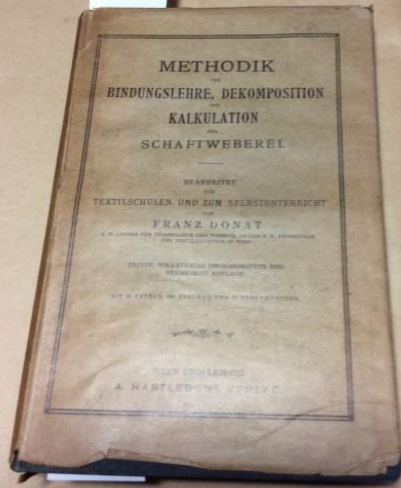

E. A. POSSELT, AUTHOR AND PUBLISHER,

THE TEXTILE DESIGNER

214
 In Fig. 3 and 4, the winding frame is shown in its normal position, and the whole length of the thread is wound on the bobbin. The frame is shown in its normal position, and the whole length of the thread is wound on the bobbin. The frame is shown in its normal position, and the whole length of the thread is wound on the bobbin.

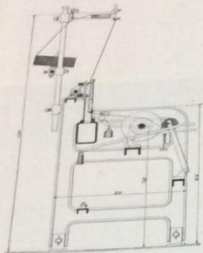

FIG. 3.

The upper part of the cover has a hole, I for guiding the thread. The cover has a hole, I for guiding the thread. The cover has a hole, I for guiding the thread. The cover has a hole, I for guiding the thread.

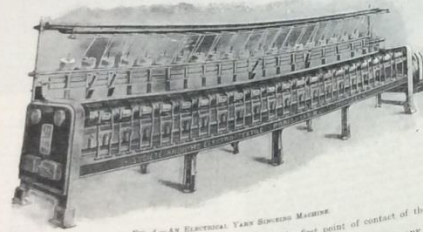

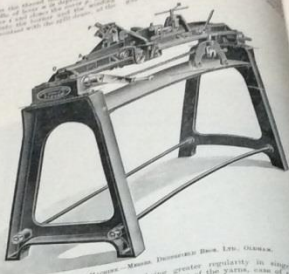

FIG. 4.—AN ELECTRICAL YARN WINDING MACHINE

which is the first point of contact of the thread after emerging. The frame can be adapted for any class of material, such as cotton, spun silk, schappe, wool, ramie, or flax. Its operation is simple, and the motion, passes through opening y in the cover and thence through the split drawn on to the winding bobbin. The whole course of the thread can be seen in Fig. 5, and a photographic illustration of a frame is given at Fig. 4.

PATENT FLAT CLIPPING MACHINE

PATENT FLAT CLIPPING MACHINE

[UNION PATENT OFFICE, WASHINGTON, D. C.]

These are many comparatively small and very which could be performed on the flat. If only suitable machines or apparatus are desired for the purpose. By means of alterations or renewals at the mill, the machine shop would be avoided. The machine has been specially designed for the use of cotton spinners, and who require to reclaim the end bobbins. When it is desired to reclaim the end bobbins, with its clips attached to the top, and placed face down in the vice B, and flat A is placed upon it between the clips A, as shown at B, and by means of the vice is screwed up by the screw which causes the clips to hold well on the edge of the flat. The cramps B are placed and the machine is ready for the material. The actual heading and securing of the ends by means of two bolts is shown in the illustrations which are set each in a frame. These bolts are so constructed that they are regulated in an instant to suit any angle to the given point by setting screw P to any angle. The bolts are traversed to the end of the machine by chain gear and the handle H.

A "RING MULE" FRAME.

[UNION PATENT OFFICE, WASHINGTON, D. C.]

Masses of yarn have been produced in the past by the use of the ring mule. These masses of yarn have been produced in the past by the use of the ring mule. These masses of yarn have been produced in the past by the use of the ring mule. These masses of yarn have been produced in the past by the use of the ring mule.

AN INTRODUCTION TO THE STUDY OF TEXTILE DESIGN

BY

ALDRED F. BARKER

HEAD OF THE DEPARTMENT OF TEXTILE INDUSTRIES,
BRADFORD MUNICIPAL TECHNICAL COLLEGE

WITH NUMEROUS ILLUSTRATIONS AND DIAGRAMS

METHUEN & CO.
36 ESSEX STREET W.C.
LONDON
1903

TEXT-BOOKS OF TECHNOLOGY

Edited by Professor W. GARNETT, D.C.L., Secretary of the
Technical Education Board of the London County Council,
and Professor J. WERTHEIMER, B.Sc., B.A., F.I.C., F.C.S.,
Principal of the Merchant Venturers' Technical College,
Bristol.

Messrs. Methuen and Co. are issuing a series of elementary
books under the above Title. They are specially adapted to
the needs of Technical Schools and Colleges, and fulfil the
requirements of Students preparing for the Examinations of the
City and Guilds of London Institute.
The prices vary according to the size of the Volumes, which
are suitably illustrated, and are provided with numerous examples
and examination papers.

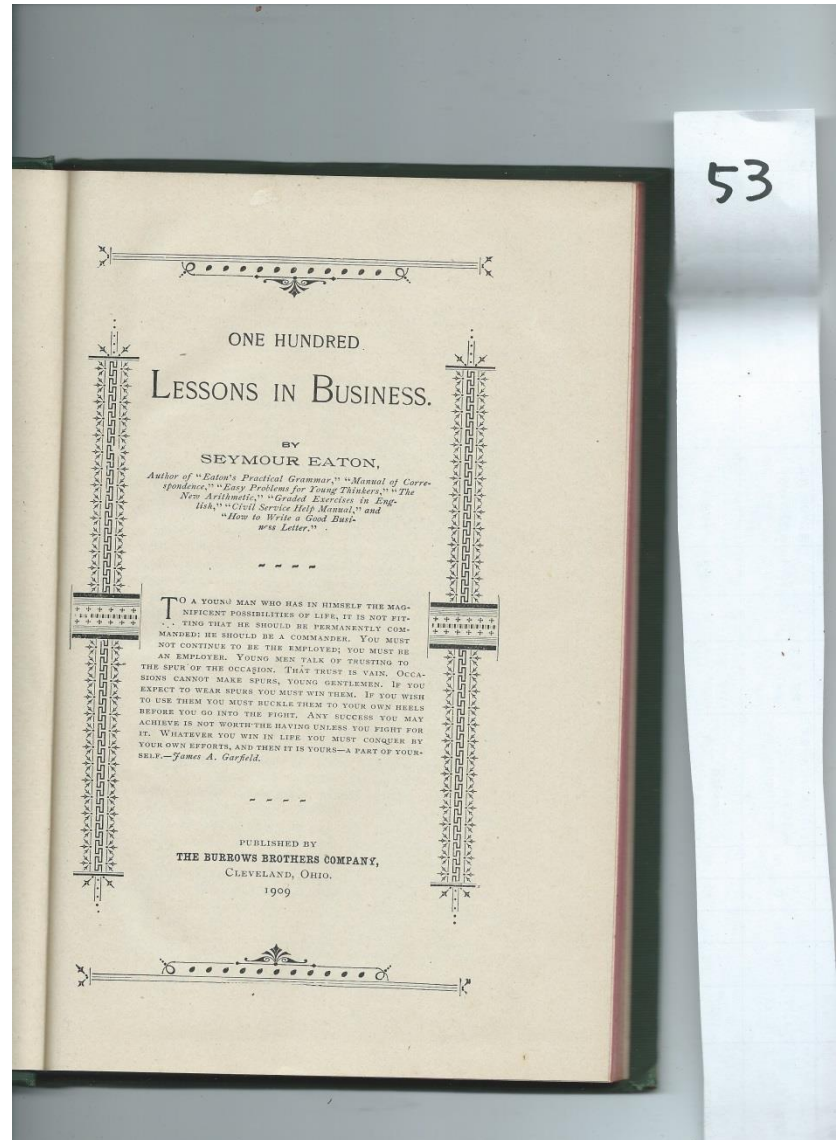

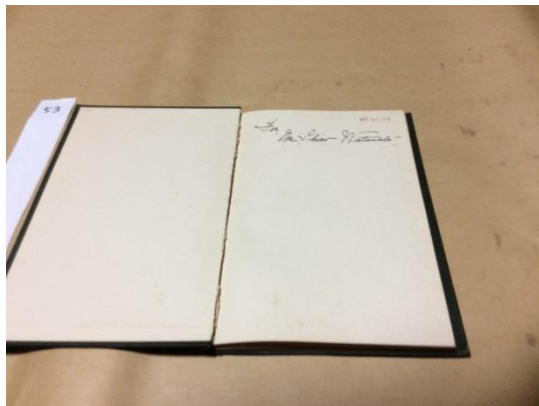

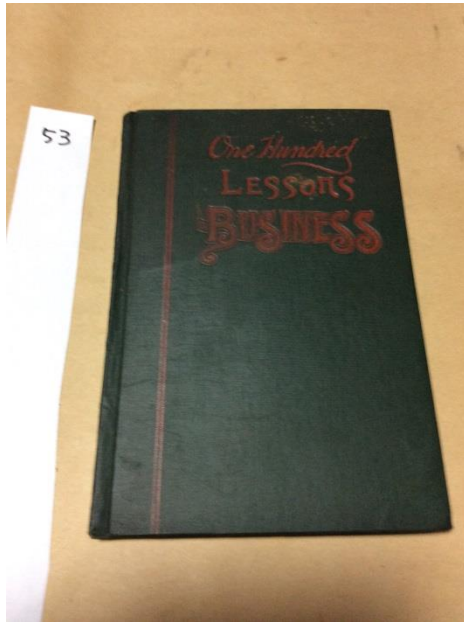

The following books are ready:

- PRACTICAL CHEMISTRY.** By W. FRENCH, M.A., Principal of the
Shury Institute, Lancaster. Crown 8vo. Second Edition. Part I.
2s. 6d.
- PRACTICAL MECHANICS.** By S. H. WELLS, Principal of the Battersea
Polytechnic Institute. Crown 8vo. Second Edition. 3s. 6d.
- PRACTICAL PHYSICS.** By H. STROUT, B.Sc., M.A., Professor of
Physics in the Durham College of Science, Newcastle-on-Tyne.
Crown 8vo. 2s. 6d.
- CARPENTRY AND JOINERY.** By F. C. WERRISS, Chief Lecturer to
the Building Trade Department of the Merchant Venturers' Technical
College, Bristol. Crown 8vo. Third Edition. 3s. 6d.
- HOW TO MAKE A DRESS.** By Miss WOOD, Chief Instructor at the
Goldsmiths' Institute, New Cross. Crown 8vo. Second Edition.
2s. 6d.
- MILLINERY THEORETICAL AND PRACTICAL.** By Miss C. HULL,
Instructor to the West Riding County Council and the Leeds School
Board. Crown 8vo. 2s.
- TECHNICAL ARITHMETIC AND GEOMETRY FOR USE IN
TECHNICAL INSTITUTES.** By C. J. MILES, M.I.C.E., Principal
of the Borough Polytechnic Institute, London. Crown 8vo.
- AN INTRODUCTION TO THE STUDY OF TEXTILE DESIGN.**
By A. F. BARKER, Head of the Department of Textile Industries,
Bradford Technical College. Demy 8vo. 7s. 6d.

The following books are in preparation:

- PAINTING AND DECORATING.** By W. S. PEARCE, Lecturer in the
Municipal Technical School, Manchester.
- THE GEOLOGY OF COAL.** By G. A. LEECH, M.A., F.G.S., Professor
of Geology in the Durham College of Science, Newcastle-on-Tyne.

March 1st, 1925.

Dear Sirs,

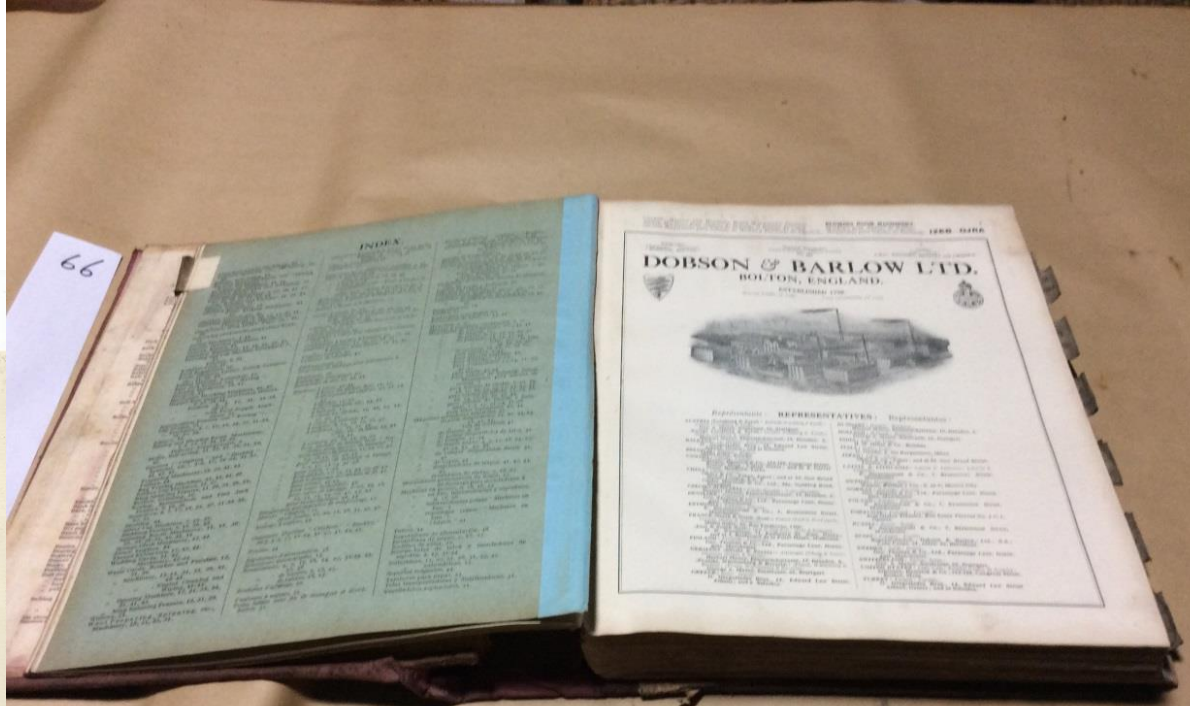

We have great pleasure in presenting you with the accompanying copy of the "British Standard Exporter," which is one of the Trade Series forming the 2nd Edition of this important work.

In compiling this further edition, we had to face the unprecedented depression in world trade, and it has accordingly been a matter of extreme difficulty to persuade Manufacturers into making an outlay on publicity for export trade under the conditions prevailing.

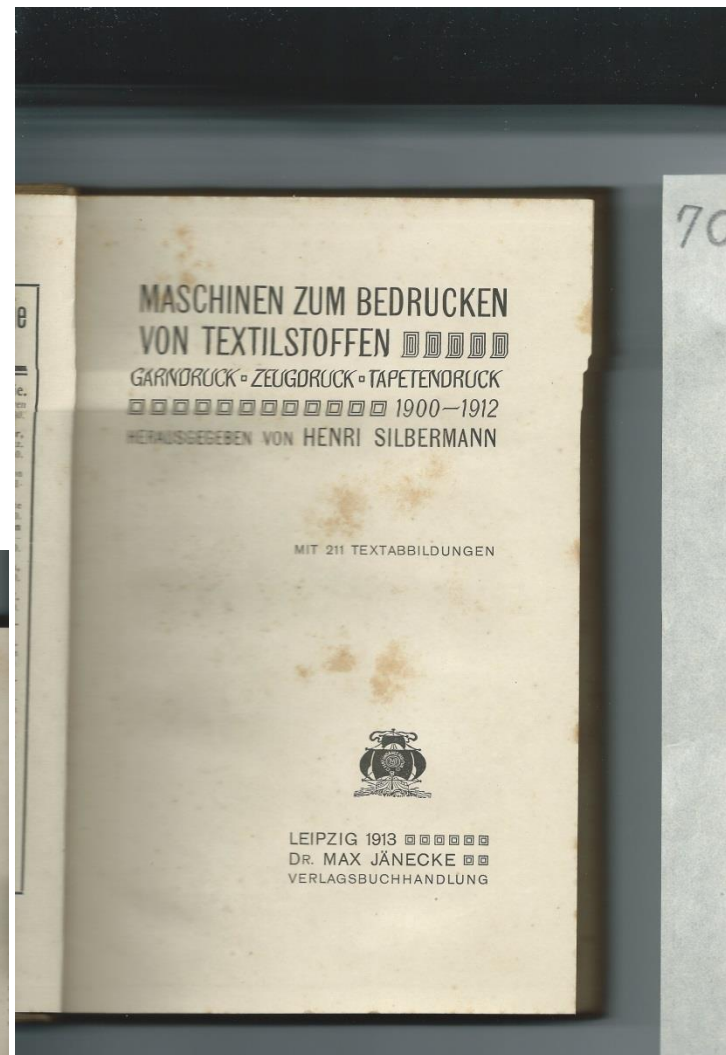

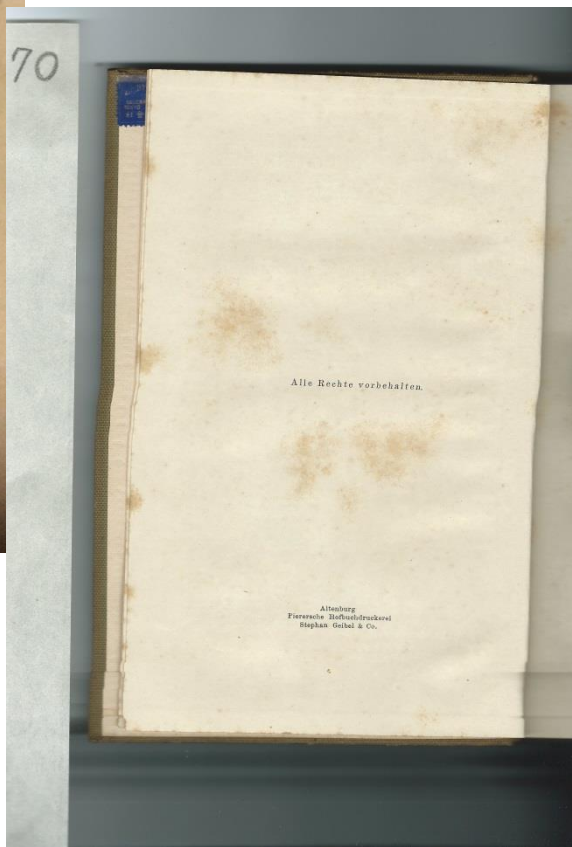

We have therefore to make a very specific appeal to all our friends to whom we present, free of cost, copies of these Catalogues, viz., to co-operate more freely with us in our endeavour to keep them supplied with information respecting goods manufactured for the Export Trade—

- By invariably heading every communication to Advertisers "Re your announcement in the British Standard Exporter."
- By conveying to Advertisers when writing them that you appreciate their progressive attitude in placing information before you in this highly efficient manner.

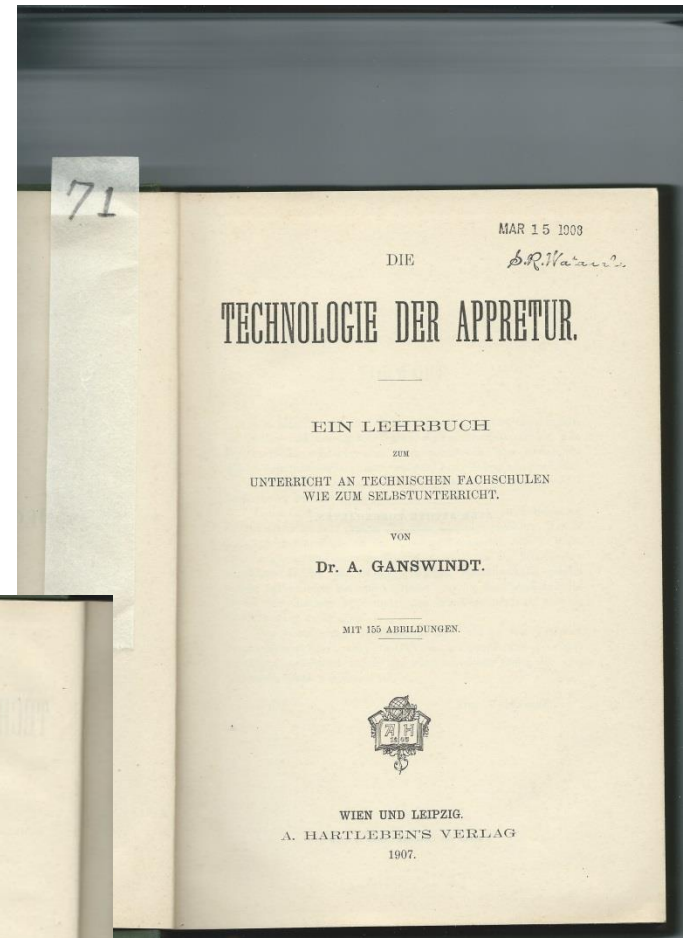

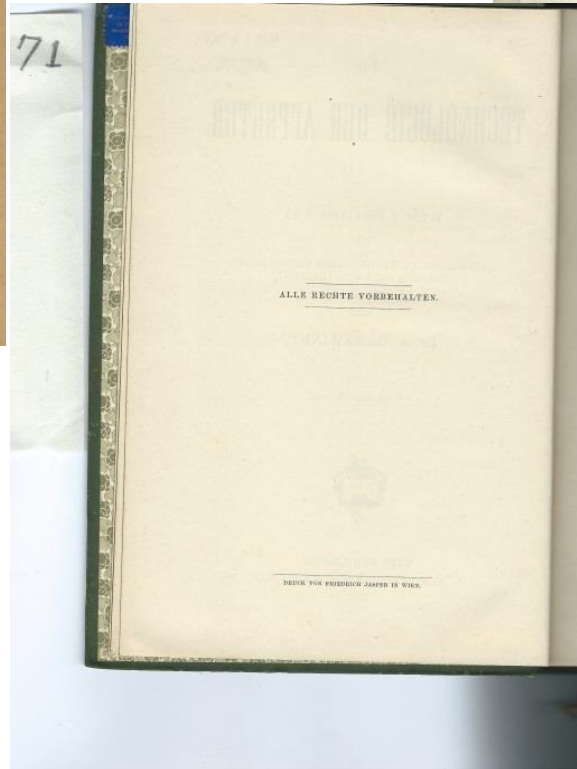

Thus you will afford every encouragement to Manufacturers to continue their support of the "British Standard Exporter" in subsequent editions.

2 THE TEXTILE MANUFACTURER YEAR BOOK

Heywood & Bridge's FRICTION CLUTCHES IMPROVED PATENTS.

A Clutch for every Drive

However difficult the drive, the standard Heywood & Bridge Clutch can be adapted to suit it perfectly :: :: ::

Long experience and the intimate study of driving problems have enabled us to adapt the Heywood & Bridge Clutch to suit every conceivable drive. It economises power by enabling Shaft, Counter-Shaft, or Machine to be instantly disconnected when not in use. It runs smoothly, grips easily, and obviates shock or jar when starting and stopping machinery and gearing at high speeds

Our 25 years' experience of Textile Driving is at your service
